

## COVID-19 Travel Safe Measures

The health, safety and well-being of our passengers and staff is our number one priority. In line with guidance from transport regulators as well as the Australian Government we have developed a COVID Safe Business Plan to provide the safest possible travel experience.

Before you begin planning, it is important to note that for a group to travel safely, any person feeling unwell or experiencing COVID-19 symptoms including *cough, fever, sore throat, fatigue, and shortness of breath* should remain at home and not travel.

Everybody in the group should follow social distancing guidelines, good respiratory and hand hygiene practices, as well as provide their contact information to assist in contact tracing efforts, should they be required.

### Physical Distancing

The Department of Health continues to encourage everyone to keep

at least 1.5 metres apart from others (outside of their family unit) where possible. Safe Work Australia guidance requires the front row behind the driver to remain empty to distance the driver by the recommended 1.5 metres from the rest of the group.
